

MyCIL Service Coordination

Proudly Providing Service Coordination
to Consumers on the Aging Waiver

Since 1988, MyCIL (Northeast PA Center for Independent Living) has been helping older people live their best, independent lives. Through MyCIL Service Coordination, we can help you develop the plan you need to live in your own home. You'll get a dedicated service coordinator who will connect you to the right community-based services in your area. More importantly, you'll get an advocate.

Serving Lackawanna, Luzerne/Wyoming, Bradford/Sullivan/Susquehanna, Wayne, Pike and Monroe Counties

Getting Started: Your Initial Home Visit

During your initial home visit, your service coordinator will help you:

- Define your needs, challenges and independent living goals
- Review your eligibility for additional Medical Assistance benefits and guide you through the application process for those you qualify for
- Develop an Individual Service Plan (ISP) to meet these challenges and goals

The Right Supports for Your Unique Needs

Once the Office of Long Term Living approves your ISP, your service coordinator will connect you with the right community-based services in your area.

From home modifications and durable medical goods to in-home assistance, you'll receive the supports you need to reach your independent living goals.

Advocating for You

Your dedicated service coordinator will:

- Meet with you in-person periodically to review your strengths, needs, preferences, supports and goals
- Update your ISP as needed to continue reaching your independent living goals
- Track the services you're receiving to ensure they meet your identified needs
- Advocate for you to ensure your health and welfare

MyCIL's mission is to enhance living options for individuals who desire to remain as independent as possible in their home environment. We encourage and develop a positive perception of aging and monitor the care plans in place to ensure the health and welfare of the Aging Waiver Consumers.
